PROFILE SUMMARY

Software Test Engineer with hands-on experience in manual testing, test case design, defect life cycle management, and SDLC/STLC processes across internship and full-time roles. Works directly with developers to resolve issues, validate fixes, and support quality across concurrent projects. Looking to build on this into a client-facing delivery role combining testing, configuration, and issue resolution.

KEY SKILLS

- Testing: Manual Testing, Functional, Regression, Smoke & Sanity Testing, System Testing, Test Plan & Test Script Development
- Methodologies: SDLC, STLC, Agile
- Defect & Issue Management: Defect Logging, Defect Life Cycle, Severity & Priority Triage, Issue Resolution, Change Request Documentation
- Collaboration: Cross-functional coordination with developers and peers, knowledge sharing, effective written and verbal communication
- Problem-Solving: Strong analytical and debugging skills, root-cause investigation

WORK EXPERIENCE

Software Test Engineer | Ahana Systems and Solutions Pvt. Ltd, Bangalore *March 2026 - Present*

- Perform manual testing on web-based applications across multiple concurrent client and internal projects
- Create and execute structured test cases and test scenarios, and maintain test documentation to a consistent standard
- Identify, report, and track defects through the full defect life cycle, coordinating resolution with development teams
- Conduct regression, smoke, and functional testing to validate fixes and confirm system changes before release
- Collaborate closely with developers and peer testers to resolve issues, share findings, and improve overall application quality

PROJECTS

PMO Dashboard Application

- Tested a PMO dashboard used for tracking initiatives and workstreams, covering creation, ownership assignment, and project allocation
- Validated project details including start/end dates, ownership mapping, and workflow accuracy against business requirements
- Verified project status tracking (on-time, delayed, in-progress) to ensure data accuracy across dashboards
- Designed and executed end-to-end test cases, reported defects, and validated fixes through regression testing

Project Code Management Application

- Tested application functionality for creation and management of project codes across internal and client projects
- Performed functional testing on configuration-driven features including creation, editing, deactivation, and reactivation
- Verified audit logs and change history tracking to confirm accurate system behavior after configuration changes
- Ensured data integrity and correct system behavior across end-to-end workflows

INTERNSHIP

Software Testing with Java | Dhee Coding Lab, Bangalore *Jun 2025 - Dec 2025*

- Gained hands-on experience in manual testing of web applications, including test case design and execution
- Learned and applied defect life cycle and structured bug reporting processes
- Performed functional testing on core features such as login, forms, and field-level validations
- Practiced real-time testing scenarios to evaluate application functionality and usability

EDUCATION

Master of Computer Applications (MCA) | N.M.A.M. Institute of Technology, Nitte | 7.87 CGPA *Nov 2022 - Aug 2024*

Bachelor of Computer Applications (BCA) | Sri Ramakrishna College, Mangalore | 7.96 CGPA *Jun 2019 - Oct 2022*

CERTIFICATIONS

- DCL Certification in Software Testing with Java
- Deloitte Australia's Data Analytics
- Accenture North America Data Analytics and Visualization
